TYPE RATING CERTIFICATE

Issued under the authority of the Aviation Division | EASA Style Certification Authority

Pilot Information

Pilot Name:	Denis Komarov
VATSIM ID:	1942713
Simulator:	Microsoft Flight Simulator 2020
Airline Affiliation:	Italia Trasporto Aereo S.p.A.
Total Flight Hours:	75 hrs
IFR Certification:	Assumed (based on VATSIM usage)

Logged Flight Hours

Aircraft Type	ICAO	Add-on	Flight Hours
Airbus A320neo	A20N	FBW	30 hrs
Airbus A330-900	A339	Headwind	30 hrs
Airbus A321neo	A21N	LVFR	15 hrs

Type Ratings & Aircraft Endorsements

Aircraft Type	ICAO	Status	Required for Full Rating
Airbus A350-900	A359	■■ LIMITED	1–2 supervised flights
Airbus A350-1000	A35K	■■ LIMITED	1–2 supervised flights
Boeing 767-300ER	B763	■ NOT RATED	Type transition training
Boeing 787-8	B788	■ NOT RATED	Full conversion training
Boeing 777	B77W	■ NOT RATED	Full conversion training

Remarks:

Pilot has demonstrated proficiency in Airbus fly-by-wire systems (A320/A321/A330) under IFR conditions. Limited endorsement granted for A350 types pending supervised familiarization. Boeing aircraft not endorsed at this time; conversion training required.

Date of Issue: 21 September 2025

Authorized by: Type Rating & Standards Officer

Signature: 

Document ID: EASA-TRC/0925/75hrs

TYPE TRANSITION PLAN – AIRBUS TO BOEING

Differences Between Airbus and Boeing

Boeing aircraft feature yoke-based manual control with no active flight envelope protections, unlike Airbus' side-stick with flight control laws. Autothrottle logic differs significantly, with Boeing using THR REF / HOLD / SPD modes instead of Airbus' CLB/FLEX detents. CDU interface and VNAV/LNAV behavior require new adaptation.

Virtual Training Plan

1. Study Systems (via manuals or YouTube CBTs): FMC, MCP, electrical, hydraulics, fuel.
2. Practice flights offline: hand-fly takeoffs/landings, use MCP and VNAV/LNAV, perform STAR/SID procedures.
3. Perform a checkride flight (optional): full IFR flight in VATSIM, record evidence of CDU/MCP usage.

Comparison Table

Element	Airbus	Boeing
Flight Controls	Sidestick + Laws	Yoke + Manual
Autopilot	Managed/Selected	VNAV / LNAV
Thrust Modes	CLB / TOGA / FLEX	THR REF / HOLD / SPD
FMS Display	MCDU	CDU
System Feedback	ECAM	EICAS

Next Steps

To unlock Boeing type endorsements, perform structured flights using the B767, B787, or B777 in MSFS2020 with full systems usage, under IFR conditions. Keep logs or video records and request reassessment. Optional: join virtual airline trainings or Discord-based mentoring programs.
